

Dynamic Reassignment Overview

Dynamic Reassignment functionality allows dynamic learning assignments to reassign training that a user may have had on their transcript previously, before it was removed.

When a user changes organizational units (OUs), that user can be re-assigned the same training that a dynamic assignment has already attempted to assign to the user in the past, as long as they meet the assignment criteria. For example, when users transfer from one OU to another, and then transfer back to the original OU, the training that was originally assigned to them is restored to their transcript via dynamic reassignment.

The dynamic reassignment default can be set at the portal level, and if enabled, administrators have the option of turning dynamic reassignment off and on for individual dynamic assignments.

- For information about managing the Dynamic Reassignment setting on the Assignment Summary page, see [Dynamic Reassignment - Assignment Summary](#).
- For information about the impact of the Dynamic Reassignment setting on learning assignment email behavior, see [Dynamic Reassignment - Emails](#).

Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Assignment Tool - Dynamic Reassignment	Grants ability to enable/disable Dynamic Re-assignment for an assignment after submission. When Dynamic Re-assignment is enabled, users that meet the User Criteria again (after previously being dynamically removed) are re-assigned. This permission is dependent on the Assignment - Standard, Dynamic - Standard and Dynamic, and Dynamic Assignment - Standard and Dynamic - Recurrence permissions. This permission cannot be constrained. This is an administrator permission.	Learning - Administration
Assignment Tool Preferences	Grants access to Assignment Tool Preferences where an administrator can activate the new Assignment Tool and configure the processing options and settings to create Learning Assignments. This permission cannot be constrained. This is an administrator permission.	Learning - Administration
Assignment Tool - Standard and Dynamic - Recurrence	Grants ability to create Standard (one-time) and Dynamic (continuous) Learning Assignments to directly assign training to users. Also grants ability to enable/disable Recurrence when creating a Dynamic Learning Assignment. This permission can be constrained by OU, Provider, Training Item, Training Type, User, User Self and Subordinates, and User's OU. If this permission is constrained by Location, Provider, Training Type, or Training Item, then they can only assign training within the constraints. If this permission is constrained by OU, User, User Self and Subordinates, or User's OU, then they can only assign to users within the constraints and view assignments created by users within the constraints. This is an administrator permission.	Learning - Administration
Assignment Tool - Standard and Dynamic	Grants ability to create Standard (one-time) and Dynamic (continuous) Learning Assignments to directly assign training to users. This permission can be constrained by OU, Provider, Training Item, Training Type, User, User Self and Subordinates, and User's OU. If this permission is constrained by Location, Provider, Training Type, or Training Item, then they can only assign training within the constraints. If this permission is constrained by OU, User, User Self and Subordinates, or User's OU then they can only assign to users within the constraints and view assignments created by users within the constraints. This is an administrator permission.	Learning - Administration
Assignment Tool - Standard	Grants ability to create Standard (one-time) Learning Assignments to directly assign training to users. This permission can be constrained by OU, Provider, Training Item, Training Type, User, User Self and Subordinates, and User's OU. If this permission is constrained by Location, Provider, Training Type, or Training Item, then they can only assign training within the constraints. If this permission is constrained by OU, User, User Self and Subordinates, or User's OU then they can only assign to users within the constraints and view assignments created by users within the constraints. This is an administrator permission.	Learning - Administration
