Security Role - Create

To create a security role, follow these steps:

- 1. Go to Admin > Tools > Core Functions > Security Role Administration.
- 2. Click the **Create New Role** link.
- 3. Complete the following steps:
 - 1. General See Security Role Create Step 1 General.
 - 2. Permissions See Security Role Create Step 2 Permissions.
 - 3. Constraints See Security Role Create Step 3 Constraints.

Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
	Grants access to apply general constraints to permissions when creating/editing a security role. This permission works in conjunction with the Security Administration - Manager permission. This is an administrator permission.	Core Administration
	Grants ability to create, modify and constrain security roles within the portal, and assign users to those security roles. This permission can be constrained by OU, User's OU, User, and User Self and Subordinates. This is an administrator permission.	Core Administration
