Administrator Topic

Curriculum - Reversion - Confirm

The Confirm page enables administrators to define when the new curriculum version is effective and whether users are able to maintain their curriculum progress with the new version. Administrators can also provide comments to describe the curriculum changes.

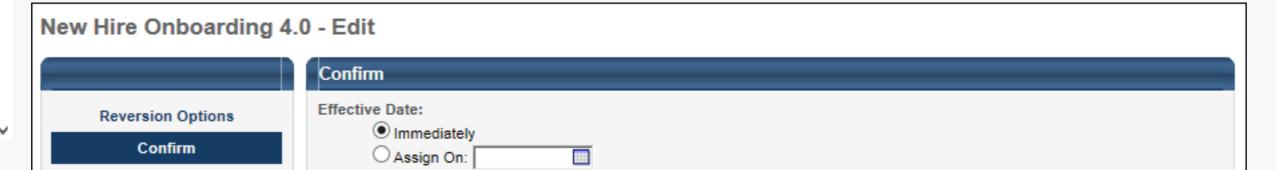

Filter Q

To edit a curriculum, go to Admin > Tools > Learning > Catalog Management > Curricula. Next to the curriculum, click the Edit icon. If the modifications warrant a new version, the Reversion Options page opens when the curriculum is saved.

Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
	Grants ability to create new and edit/update existing curricula. This permission can be constrained by OU, User's OU, Provider, and User's LO Availability. This is an administrator permission.	Learning - Administration
	Adding an OU constraint and a provider constraint to this permission results in an "AND" statement.	
	Tip: Do not constrain this permission to your entire corporation; it can cause long page load times and timeout errors. Applying this constraint is functionally the same as leaving the permission unconstrained, but omitting this constraint does not cause the system to do the unnecessary constraint checks as in the former scenario.	
Curriculum Owner	Grants ability for those designated as owner of one or more existing curricula to make edits/updates to those curricula. This is an administrator permission.	Learning - Administration

EMAIL NAME	EMAIL DESCRIPTION	ACTION TYPE
Updated Training	Training has been updated to a new version, or pre-work, post-work, or a prerequisite is has been updated or added to the LO.	System Administration
	This is triggered by the user getting automatically updated to a new version of a LO. This email is only triggered by updates to LOs that are versioned, such as an online course, material, test, or curriculum. This email will not trigger for child LOs when they are versioned; in case of child LO versioning, the email will only trigger for the curriculum on the user's transcript.	
	The TITLE tag enables email recipients to know which learning object (LO) is updated. This tag displays the name of the LO.	
	The MATERIAL.START.DATE tag displays the material's start date. If the material has multiple versions, then this tag is specific to the material version. If this field is not defined for the training, then this tag is not included in the email.	
	The MATERIAL.END.DATE tag displays the material's end date. If the material has multiple versions, then this tag is specific to the material version. If this field is not defined for the training, then this tag is not included in the email.
