## **Custom Field Admin - SF-182**

The SF-182 Custom Fields page enables administrators to manage the custom fields that are available for the SF-182 request form. The fields in Custom Field Administration appear on the **Configure Fields** tab of SF-182 Preferences, where they can be configured to display on the request form.

Default custom fields are configured for you. For more information: See Default SF-182 Custom Fields.

To manage custom fields, go to Admin > Tools > Core Functions > Custom Field Administration. Then select the appropriate tab from the left-side panel.
