External Content - Create

External content allows playlist creators to add training to their playlists even if the training is published outside the learning management system (LMS). Creators can add links to videos, books, external online courses, and more.

To add external content to a playlist, go to Learning > Playlists. You must have permission to create playlists and the permission to create external content. Either click the Create New button to create a new playlist, or click the title of an existing playlist to make changes to a previously created playlist.

Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Course Catalog - Update	Grants ability to manage and edit training items listed in the Course Catalog and grants access to the Course Console, where training can also be managed and edited. This permission also grants access to the Popular Requests and Highest Rated widgets on the Learning Admin Console (in conjunction with the Learning Admin Console - View permission). This permission also allows administrators to version online courses via the Course Console page. This permission also allows administrators to access an Edit Training option for training items included as objectives in Development plans.	Learning - Administration
	This permission can be constrained by OU, User's OU, Training Type, Training Item, Provider, ILT Provider, User's ILT Provider, User, User, User Self and Subordinates, and User's LO Availability. This is an administrator permission.	
	Note: Adding an OU constraint and a provider constraint to this permission results in an "AND" statement.	
Course Catalog - View	Grants access to view the learning objects in the course catalog and enables administrators to view the Course Console and the Popular Requests and Highest Rated widgets on the Learning Admin Console (in conjunction with the Learning Admin Console - View permission). This permission can be constrained by OU, User's OU, Training Type, Training Item, Provider, ILT Provider, User's ILT Provider, and User's LO Availability. This is an administrator permission.	Learning - Administration
	Adding an OU constraint and a provider constraint to this permission results in an "AND" statement.	
External Content - Create	Grants the ability to create external content. This permission can be constrained by OU or by aspects of the user. When a user creates external content, the availability is determined by the constraints of the permission. This is an end user permission.	Learning
earner Home	Grants access to the Learner Home and the Learning Search page. This is an end user permission. This permission cannot be constrained.	Learning
Playlists - Create	Grants ability to create private Learning Playlists. This permission cannot be constrained. This is an end user permission.	Learning - Administration
Playlists - Make Visible	Grants the playlist creator the ability to make their playlists visible to others. This permission can be constrained by OU and User's OU. If this permission is constrained, then only users within the constraints can see the playlist. If this permission is not constrained, all users in the portal can see the Playlist. This is an end user permission.	Learning - Administration
	If this permission is added to a standard security role (Approver, Cost Center Approver, Instructor, Manager, etc.), the constraints of the role are applied to the permission. The users included in the constraints of the role are also the users who can view the playlists made visible by a user with the Playlists - Make Visible permission. If this is not the desired result, add this permission to a non-standard security role to ensure the constraints appropriately limit access to playlists.	
laylists - View	Playlists will be visible to users with this permission. The user can search for playlists, follow playlists, and consume training	Learning - Administration
