Material - Create Version - Reversion Options (Versioning with Append)

The Reversion Options page enables administrators to define which users are impacted by the new version of the material. Administrators can select which users are assigned the new version by their status for the material. Administrators can also assign the new version to all users with a previous version on their transcript, users who were assigned the material by dynamic proxy enrollment, or users in a specific organizational unit (OU).

This topic applies to organizations that are using Versioning with Append for materials.

Note: The Select option is not available in the Results section when the material version's Effective Date is in the future. The new version is automatically assigned to all users in the selected criteria.

To create a new version of a material, go to Admin > Tools > Learning > Catalog Management > Materials. Select the Create Version icon for the appropriate material. This option is only available for organizations using Versioning with Append.

Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Curricula Version - Manage	The constraints on this permission determine for which users the administrator can assign a new version of a curriculum when reversioning the curriculum. This permission works in conjunction with the Curricula Admin - Manage permission. The constraints on this permission determine for which users the administrator can assign a new version of a curriculum when reversioning a material that is contained within a curriculum. This permission can be constrained by OU, User's OU, and User. This is an administrator permission.	Learning - Administration
Material Version with Append - Manage	Grants ability to create versions of a material. This permission works in conjunction with the Materials Management permission. This permission can be constrained by OU, User's OU, and Users. This permission only applies to organizations that are using Versioning with Append for materials.	Learning - Administration
Materials Management	Grants ability to view the Material Administration page and create, edit, and copy materials. Once created, these "materials" can be managed like other learning objects via the course catalog. This permission can be constrained by OU, User's OU, and Provider. The constraints on this permission determine which materials the administrator is able to view, edit, copy, and create. This is an administrator permission.	Learning - Administration
Assignment Tool - Standard and Dynamic	Grants ability to create Standard (one-time) and Dynamic (continuous) Learning Assignments to directly assign training to users. This permission can be constrained by OU, Provider, Training Item, Training Type, User, User Self and Subordinates, and User's OU. If this permission is constrained by Location, Provider, Training Type, or Training Item, then they can only assign training within the constraints. If this permission is constrained by OU, User, User Self and Subordinates, or User's OUthen they can only assign to users within the constraints and view assignments created by users within the constraints. This is an administrator permission.	Learning - Administration
