Level 1 Reaction Evaluation - Create

Level 1 Evaluations are used to measure and record a learner's reaction to training they've recently completed, such as their rating of the course content, materials, and relevance. Level 1 Evaluations are the most commonly used type of Cornerstone evaluation and can be attached to various learning object (LO) types. The information gathered by Level 1 Evaluations can drive decisions about the types of training that are most effective and engaging to your learning audience.

Evaluation Availability: With most learning objects (LOs), the evaluation is available to the user after the LO is completed. When an evaluation is used with an event session and not set as required, it is available to the user at the session start time. In the case of a multi-part session, it is available at the session start time of the final part. When an evaluation is used with an event session and set to required, the roster will need to be submitted before the learner can access the evaluation. They will need to be in a 'Pending Evaluation' status to Evaluate.

For troubleshooting information regarding Level 1 evaluations: *See Troubleshooting Guide - Level 1 Evaluations.See Troubleshooting Guide - Level 1 Evaluations.*

To access Level 1 (Reaction) evaluations, go to Admin > Tools > Learning > Catalog Management > Evaluations. Then, click the **Level 1 (Reaction)** link on the left navigation panel.
