Learning Feature Activation Preferences

🖨 ⤡ ✎ ◁ ▷

The Feature Activation Preferences page allows administrators to self-enable different system features.

To access Learning Feature Activation Preferences, go to: **Admin > Tools > Learning > Learning Preferences** and click the **Feature Activation Preferences** link.

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Learning Features Self Activation	Grants access to the Feature Activation Preferences page, where an administrator can activate new features associated with Learning, Connect and Extended Enterprise.	Learning - Administration

Activate Content Publishing Features for Online Courses

In order for Content Publishing functionality to be accessible in the portal, an administrator must activate it. To activate Content Publishing functionality for online courses in your portal:

1. Click **Activate** in the Activate Content Publisher Features section. A warning message appears, asking if you are certain you want to activate Content Publishing functionality in the portal.
2. Click **Activate** to complete the activation of Content Publishing features in the portal. Once activated, this functionality cannot be deactivated, and the old Course Publisher is no longer active or accessible. To exit without activating Content Publishing functionality, click the **Cancel** button.
3. Log out of the portal and log in again to receive the permissions associated with the new functionality and begin using the Content Publisher.

After the feature has been activated, the orange header for the section turns green to indicate the activation was successful. The **Activate** button is no longer available once the feature has been activated.
