Administrator Topic

Curricula Preferences

The Curricula Preferences page enables administrators to configure whether or not a learning object (LO) can be added to multiple recurring curricula.

To manage Curricula Preferences page, go to Admin > Tools > Learning > Learning Preferences > Curricula Preferences.

🔒 Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Curricula Preferences	Grants ability to configure Curricula Preferences, which grants the ability to allow or disallow the same learning object (LO) from being added to multiple recurring curricula. This permission cannot be constrained. This is an administrator permission.	Learning - Administration

Curricula Preferences

☑ Allow recurring curriculum to have learning objects in common with other recurring curricula.

    Changes made to this setting affect only curricula modified going forward. Any configuration made previously to recurring curricula will not be affected.

Set the default values for managing the learning objects being removed from a curriculum for Registered and In-Progress users. Define whether an administrator can edit the default value.   ⬜ Editable

    ◯ Add this learning object as standalone training in user's transcript

    ◉ Remove this learning object from the user's transcript

        ☐ Remove all Sessions of Selected Event

Note: If the learning object is already part of User's Active Transcript (in standalone or within another curriculum), selecting an option would not trigger any change in the users' transcripts

Allow Recurring Curriculum to Have Learning Objects in Common with Other Recurring Curricula

- **Allow recurring curriculum to have learning objects in common with other recurring curricula** - When this option is selected, a LO can be added to more than one recurring curricula. When this option is not selected, the system prevents administrators from saving a recurring curriculum that contains a LO that exists within another recurring curriculum.
  - This preference only impacts curricula that are created or modified after the preference is modified. For example, this option is selected and multiple curricula are created which contain one or more of the same LOs
