Learning > Course Catalog > Curricula > Curriculum - Reversion > Reversion Options

Curriculum - Reversion - Reversion Options

The Reversion Options page enables administrators to specify which users are impacted by the new version of the curriculum. Administrators can select which users are assigned the new version by the version that is currently on their transcript and by the status of their curriculum. Administrators can also assign the new version to all users with a previous version on their transcript, users who were assigned the curriculum by learning assignment, or users in a specific organizational unit (OU).

To edit a curriculum, go to Admin > Tools > Learning > Catalog Management > Curricula. Next to the curriculum, click the Edit icon. If the modifications warrant a new version, then the Reversion Options page opens when the curriculum is saved.

🔒 Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Curricula Admin - Manage	Grants ability to create new and edit/update existing curricula. This permission can be constrained by OU, User's OU, Provider, and User's LO Availability. This is an administrator permission. Adding an OU constraint and a provider constraint to this permission results in an "AND" statement. *Tip: Do not constrain this permission to your entire corporation; it can cause long page load times and timeout errors. Applying this constraint is functionally the same as leaving the permission unconstrained, but omitting this constraint does not cause the system to do the unnecessary constraint checks as in the former scenario.*	Learning - Administration
Curricula Version - Manage	The constraints on this permission determine for which users the administrator can assign a new version of a curriculum when reversioning the curriculum. This permission works in conjunction with the Curricula Admin - Manage permission. The constraints on this permission determine for which users the administrator can assign a new version of a curriculum when reversioning a material that is contained within a curriculum. This permission can be constrained by OU, User's OU, and User. This is an administrator permission.	Learning - Administration
Curriculum Owner	Grants ability for those designated as owner of one or more existing curricula to make edits/updates to those curricula. This is an administrator permission.	Learning - Administration
Assignment Tool - Standard and Dynamic	Grants ability to create Standard (one-time) and Dynamic (continuous) Learning Assignments to directly assign training to users. This permission can be constrained by OU, Provider, Training Item, Training Type, User, User Self and Subordinates, and User's OU. If this permission is constrained by Location, Provider, Training Type, or Training Item, then they can only assign training within the constraints. If this permission is constrained by OU, User, User Self and Subordinates, or User's OUthen they can only assign to users within the constraints and view assignments created by users within the constraints. This is an administrator permission.	Learning - Administration

8-28 curriculum note 3.0 - Edit

Reversion Options

To complete the curriculum reversion, define which users will be impacted by this change, if any.

Version: All Versions ▾

Status: ☑ Not Started
☑ In Progress
☐ Completed

Assign To: ○ Users with Previous Version(s) on Transcript
● Users Assigned by Dynamic Assignment
○ Define by OU
