Administrator Topic

Marketplace - Browse Edge Integrations

The Edge Marketplace enables administrators to conveniently browse and discover all available integrations.

Organizations may use connectors, which are packaged APIs, to integrate your vendor's system with Cornerstone.

- *See Connectors - Tools for Developers.*
- How do I use a connector to build an integration with Cornerstone?

To browse all available integrations, go to Admin > Tools > Edge > Marketplace. The Marketplace opens in a new browser tab.

When using any of the Edge services, such as Marketplace or Integrations, administrators can navigate between the services by clicking the Menu icon ☰ in the upper-right corner of the page and selecting the desired service:

- Marketplace - *See Marketplace - Browse Edge Integrations.*
- Integrations - *See Integrations - View and Manage My Edge Integrations.*

🔒 Permissions

PERMISSION NAME	PERMISSION DESCRIPTION	CATEGORY
Edge Marketplace - Manage	Grants access to the Marketplace service for Edge Integrate, where the administrator can browse integrations that can be used to extend the Cornerstone system. This permission cannot be constrained. This is an administrator permission.	Edge
